

XXK

A CELEBRATION

XK LIVES

XK is always a sensation. From its launch and incredible reception at the London Motor Show of 1948 as XK120 to its present exquisite all-aluminium form, XK has delivered stunning design, awe-inspiring performance and technological innovation. **Today, more than ever, XK is something to celebrate.**

XK120 – 1948

XK120 was the first of the truly modern Jaguar cars, with aluminium forming an intrinsic part of its DNA as well as being the test-bed for Jaguar's famous XK engine. This beautiful car – slightly modified with a full aluminium undertray – that in 1949 achieved 132.596mph through the flying mile in Belgium to be dubbed the 'fastest production car in the world'. Originally intended as a limited run of only 200 vehicles, it paved the way for the advances and successes that were to follow with XK140 and XK150 and, during the 1990s, with XK8.

1948

XK120 is revealed to the world at the London Motor Show, Earls Court.

1950

In a highly successful year on the track, Jaguar scoops the team prize in the Silverstone Production Car Race. Five XK120s entered the contest, including the outright winner driven to victory by Peter Walker.

1954

XK120 becomes the first ever imported car to achieve victory in America's NASCAR. XK140 is revealed, raising power to 190bhp and increasing interior space.

1996

XK is reintroduced into the Jaguar range in the form of the beautiful new XK8. The first supercharged XKR models follow two years later.

XK – 2014

The XK philosophy was totally re-energised and reinvigorated in 2007 by the introduction of the latest generation XK with its all-aluminium bodyshell and cutting-edge technology. The contemporary fusion of dramatic sweeping curves with low-riding profile epitomises Jaguar's reputation for stunning and seductive design. It is a philosophy that continues to live and evolve in the latest XK Signature, XK Dynamic R and XKR-S. Each is designed to deliver a unique combination of breathtaking performance and uncompromised luxury that makes every journey unforgettable.

2005

The Advanced Lightweight Coupé concept (ALC) showcases a new design language and heralds a return to aluminium construction. The all-new XK and XKR models that follow are the first production Jaguar cars to be designed by Ian Callum.

2008

The first XKR-S goes on sale. A delimited engine increases power and gives a new top speed of 174mph to make XKR-S the fastest-ever production XK.

2010

More power, greater flexibility and enhanced dynamic ability. Jaguar introduces three new 5.0 litre V8 engines into the XK range, including a supercharged 550PS version.

2013

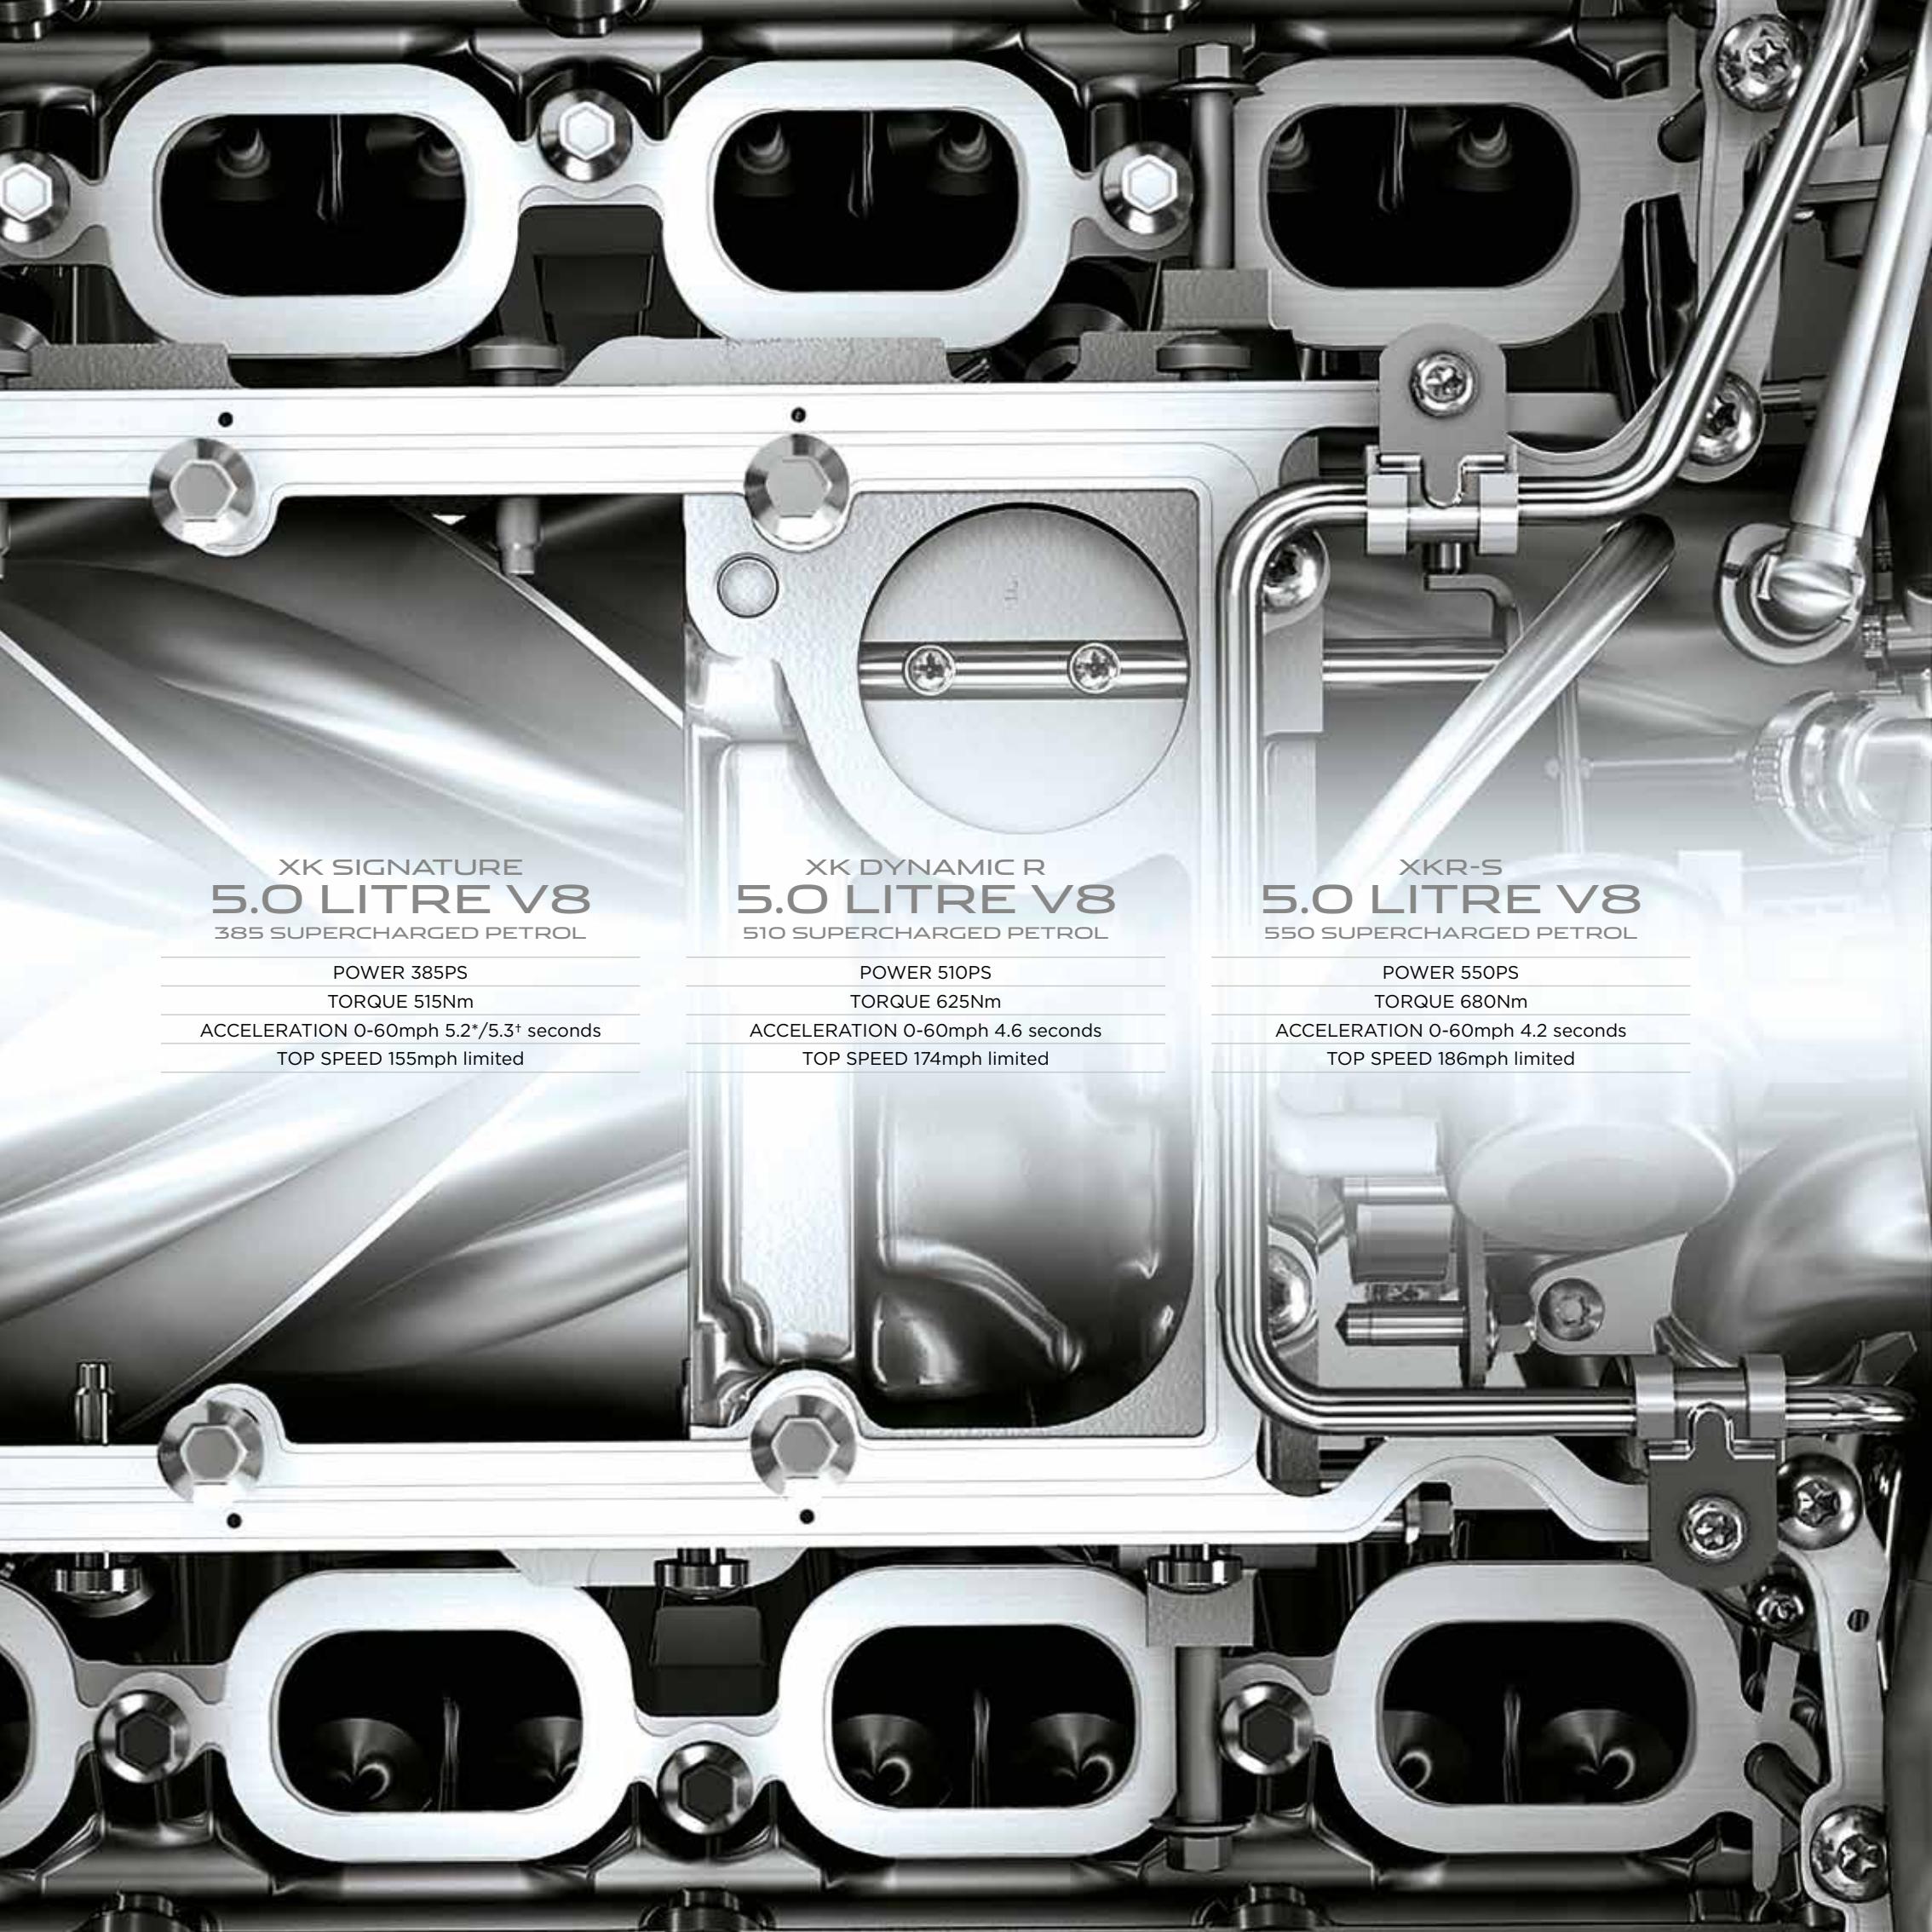

Jaguar confirms a strictly limited production run of XKR-S GT, the most extreme XK ever built. XKR-S GT is a track-inspired high performance car that takes performance and handling to a blistering new level.

A CELEBRATION OF FORM

XK is designed and engineered in two bodystyles, Coupé and Convertible. Both are built in aluminium to combine lightness with strength and rigidity – every surface is sculpted to create a visual energy, with the outer aluminium skin stretched taut over the body structure. Using technology derived from the aerospace industry, the all-aluminium body construction is fundamental to the way the car performs and is the key to great handling, superb performance and impressive efficiency. What's more, with Jaguar's commitment to sustainability, 50 percent of XK's body structure is made from recycled aluminium.

XK SIGNATURE
5.0 LITRE V8
385 SUPERCHARGED PETROL

POWER 385PS

TORQUE 515Nm

ACCELERATION 0-60mph 5.2*/5.3+ seconds

550 SUPERCHARGED PETROL

POWER 550PS

TORQUE 680Nm

ACCELERATION 0-60mph 4.2 seconds

TOP SPEED 186mph limited

A CELEBRATION OF PERFORMANCE

Every generation of XK combines performance with luxury and relevant technology that connects the driver to the car and the car to the road - it is technology that empowers, never overpowers. The new **XK Signature's** 5.0 litre V8 Petrol engine produces exhilarating acceleration with effortless power, delivering 385PS and a 0-60mph time of 5.2 seconds on Coupé and 5.3 seconds on Convertible models. The new **XK Dynamic R** has a 5.0 litre V8 Petrol engine at its heart fitted with a sixth-generation, twin vortex supercharger. This all-aluminium quad-cam powerplant produces 510PS for heart racing performance with seamless power delivery. Maximum speed increases to 174mph and the tremendous torque of up to 625Nm gives a 0-60mph time of 4.6 seconds. These two new XK models join **XKR-S**, which takes performance to the ultimate level of 0-60mph in just 4.2 seconds and a top speed of 186mph.

*5.2 seconds refers to Coupé

†5.3 seconds refers to Convertible

A CELEBRATION OF DESIGN

XK has always been created to be exceptional. From the purposeful front bumper design and chrome outlined air intakes, to the distinctive side power vents and muscular rear haunches, every XK promises both luxury and immense power. Presenting a unique visual signature, LED daytime running lights frame the advanced bi-function HID Xenon headlamps, while at the rear there are distinctive all-LED tail lamps. Every aspect of XK is ergonomically designed to enhance the driving experience. Its 2+2 configuration provides rear seats, for occasional use or as a convenient storage area. For additional practicality, Convertible models have a boot capacity of up to 313 litres rising to 330 litres on Coupé models.

A CELEBRATION OF LUXURY

There has never been a finer, more intense combination of design, luxury and quality. The latest XK gives these principles new intensity from the modern textures, flawless craftsmanship and signature phosphor blue mood lighting to the triple layer laminated roof on Convertible models that provides excellent noise insulation and when stowed minimises encroachment on the bootspace. Luxury soft grain leather interiors with twin needle stitching provide unparalleled levels of indulgence on both **XK Signature** and **XK Dynamic R**. Front seats are 16x16 way adjustable – heated and cooled on **XK Signature**, heated on **XK Dynamic R**. The combinations of colours, materials and veneers offer the opportunity for personalisation and individuality. To give every journey its unique soundtrack, the incredible Bowers & Wilkins® 525W Surround Sound System comes as standard.

PERFORMANCE SEAT WITH DIAMOND STITCH DETAIL IN WARM CHARCOAL WITH RED CONTRAST STITCH

XK SIGNATURE

XK Signature takes sporting luxury to an entirely new level. It takes the best of XK then adds an extra dimension of style, luxuriousness and comfort – it is packed with the latest high specification features and is instantly recognisable with chrome exterior detailing, stunning 20" Kalimnos alloy wheels and it's own unique badging. The most supple soft grain leather with twin needle stitching swathes the interior; there are heated and cooled Luxury 16x16 way adjustable seats and a heated leather steering wheel; as well as touches that make life that bit easier such as the reverse park camera.

ON THE ROAD PRICE:

XK Signature Coupé: £54,950.00

XK Signature Convertible: £60,950.00

STANDARD FEATURES

EXTERIOR

Bi-function HID Xenon headlamps with LED daytime running lights and automatic levelling
LED tail lamps
Automatic headlamps with washers
Rain sensing windscreen wipers
Heated exterior mirrors with electric adjustment, power-folding on locking vehicle and memory function with integrated LED side repeaters and approach lamps
Electronically operated Convertible hood with integrated tonneau cover
Heated windscreen with timer

ACCESSORIES

Personalise your Jaguar with a wide range of accessories specifically designed for your XK. Designed to complement your lifestyle, they add further individuality and enhanced practicality. A selection from our Lifestyle Collection is shown below. Accessories fitted to a new vehicle benefit from the same terms and period of cover as the Vehicle Warranty, when you have genuine Jaguar accessories fitted to your new car by a Jaguar Authorised Repairer.**

EXTERIOR STYLING

The Exterior Styling Pack is ideal for those who want to personalise their car to create an even more distinctive look.

CHROME MIRROR COVERS - £194.00

Complement your XK's striking design with these sparkling chrome mirror covers.

INTERIOR STYLING

The Interior Styling Pack is perfect for someone who enjoys taking long drives in their car but wants to remain comfortable and stylish.

LEATHER TOPPED GEAR SELECTOR - £103.00

Enjoy the sporting feel of this gear selector with premium dark leather finished top and soft touch grip rubber bezel.

BONNET LOUVRES WITH CHROME STAKE - £220.00

Highlight one of XK Dynamic R's most distinctive features with these striking body coloured louvres. Exclusive to XK Dynamic R and XKR-S.

ALUMINIUM GEAR SHIFT PADDLES - £382.00

Complete the sporting look and feel of your steering wheel with these premium aluminium paddles.

*Pricing shown includes VAT and dealer fitting costs. Prices subject to change, please contact your dealer for latest prices.

†A 'new' car is a car within one month of purchase or 1,000 miles, whichever comes first.

Configure your vehicle at [JAGUAR.CO.UK/BUILD-YOURS](https://www.jaguar.co.uk/build-yours)

TOURING

The Touring Pack is perfect for overnight trips, business trips or weekends away.

BRIGHT FINISH WIND DEFLECTOR - £534.00

Reduce wind in the cabin with this easy to install, quick to remove, wind deflector.

UTILITY

The Utility Pack is ideal for those who just want to get in and drive without worrying about the weather.

LUGGAGE COMPARTMENT LINER - £99.00

Protect the floor of your XK's boot with this fitted, semi-rigid rubber liner.

LUGGAGE COMPARTMENT FINISHER - £187.00

Enhance and protect your XK's boot with beautiful brushed stainless steel finisher with bright highlights.

ALL-WEATHER CAR COVER - £332.00

Protect your Jaguar from the elements, including showers, frost, dust and strong sunlight with this bespoke cover.

IMPORTANT NOTICE

Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and dealers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation.

Comparisons are based on manufacturer's own data and testing.

ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its engines and designs, Jaguar is committed to operating as a more sustainable business and reducing its overall environmental impact.

Jaguar's flagship XJ model was the first in the company to achieve ISO14040, the international standard for vehicle 'life cycle assessment'. This certification measures the environmental impact of XJ from component material sourcing and manufacturing process, through driving 200,000 km. But that's not all. Every new Jaguar is designed to be 85% recyclable and reusable, in addition to 95% recoverable and reusable, with 10% specifically for energy recovery.

The XJ, F-TYPE and XK's innovative use of lightweight aluminium, which incorporates up to 50% recycled material from the manufacturing process of the body structures, provided considerable performance benefits. This includes improved fuel consumption and less CO₂ emissions associated with lighter structures as well as the dynamic performance inherent in its weight saving design.

Jaguar is committed to reducing dependency on fossil fuels, using fewer resources and creating less waste as part of our approach to sustainability excellence.

The company plan includes 25% reduction targets in operating and tailpipe CO₂ emissions, waste to landfill, logistics efficiencies (15%) and water consumption (10%), all based on per vehicle built since 2007. In addition the manufacturing assembly CO₂ emissions of each Jaguar built in the UK since 2009 is 100% offset. For each tonne of CO₂ emitted in the assembly process, Jaguar invests in projects that reduce an equivalent tonne of CO₂ elsewhere.

Taking into account the company's global sales growth and increased investment in more efficient operating facilities, we are proud to have delivered and in some cases exceeded our Environmental Innovation targets as planned for 2012.

And we are on track to meet our 25% reduction in joint European fleet average tailpipe CO₂ emissions by 2015. Looking forward, we have developed our 2020 vision for sustainable business growth that focuses on continued improvements in tailpipe CO₂ emissions, operational carbon neutrality and zero waste.

To date the company has offset over 6 million tonnes of CO₂, provided over 4,000 direct jobs in 60 emissions reductions projects in 17 countries and improved the lives of over 1 million people in our global cook stoves emissions reduction programme.

But it doesn't stop there. Our manufacturing facilities have been certified to ISO14001 since 1998 and we are credited to Platinum Plus level in the UK's Business in the Community Corporate Responsibility Index.
